Introduction to the First Edition

This volume is the third in a series of nine volumes of data collected over the period 1997 – 2002 pertaining to deliberately discarded watercraft in Australia and Australian waters. Researchers should refer to Volume 1 for a description of the database, an explanation of the classificatory schema employed, and for a complete list of references used to compile the database. The sequence of the volumes following Volume 1 outlines each state of Australia alphabetically. Volume 9 represents abandoned watercraft where the state of discard could not be located during the study. This volume presents abandoned watercraft listed as deliberately discarded within the geographical confines of the Northern Territory, and the waters adjacent to its coast.

This introduction refers to these volumes as the first edition. This is attributed to the fact that the data contained herein represents provisional data. For reasons outlined in the archaeology doctoral thesis accompanying these volumes entitled *Deep Structures: An Examination of Deliberate Watercraft Abandonment in Australia* (Nathan Richards, Flinders University, 2003) abandoned vessels are generally not as visible in the historical record as their catastrophically lost counterparts. This is also a reason for the inclusion of the ninth volume of vessels discarded in “an unknown state” – it is hoped that over time the vessels listed in this volume will be excluded or integrated into the other volumes. It is also expected that between editions more discarded watercraft will need to be added to these volumes, and that details pertaining to particular watercraft will need to be amended. In some cases candidates may need to be removed as more details regarding the circumstances of the discard and loss of watercraft come to light.

Following the completion of the aforementioned doctoral thesis, and at the time of the compiling of these volumes some amendment to the information of the ANAVD has occurred. In particular, work in Tasmania has seen candidates added and removed from the database, and has also caused some augmentation to existing data.

Sequence of Volumes

<i>Volume 1:</i>	Introduction: including database specifications, guide to nomenclature and reference list
<i>Volume 2:</i>	New South Wales
<i>Volume 3:</i>	The Northern Territory
<i>Volume 4:</i>	Queensland
<i>Volume 5:</i>	South Australia
<i>Volume 6:</i>	Tasmania
<i>Volume 7:</i>	Victoria
<i>Volume 8:</i>	Western Australia
<i>Volume 9:</i>	Unknown State

Final Customs:

Notes:	Located a kiloemtres off Dudley point in 18 metres of water*2	Notes
---------------	---	--------------

"The centrepeice of this site is a steel rectangular box of approximately 15 x 20 metres, with a height of three metres. The top consists of a series of girders that run lengthwise protruding above the boxtop. The barge was large steel slab sides, and an acnhor has therefore ususally to drag across the top of the platforms for a moment before catching something. The other two sections of the wreck consists firstly of another big piece, this time a triangular section adjacent to the main box. This has circular openings on the top side and a few winch mountings."*2

Final Customs:				

Notes:	"[A] steel survey vessel of 244 tons lies abandoned about 10 nautical miles north of Darwin"*2 19 nautical miles north of Darwin harbour*3 Described as an ex-freighter*3 "The Northern Territory Government has an on-going plan to sink other wrecks within this area to create a half-circle of fish reefs. The latest fish-reef component was a number of large tries, filles with concrete and sunk on the 11th July 1991. Further parts of the reef are planned: each item will be placed about one nautical mile from others and marked with buoys."*3 Artificial Reef system called 'Fenton Patches' *4	Notes

Map showing the distribution of abandoned watercraft in association with the Northern Territory coastline and river systems. Circles denote locations of official Commonwealth dumping areas defined under the *Beaches, Fishing Ground and Sea Routes Protection Act, 1932* (Commonwealth Government 1932). Spatial data is from a variety of sources; GPS locations from archaeological inspection, official nomenclature lists of place names, and scuttling locations known by Environment Australia (see also Richards 2002; 2003).
