## NC Pathways to Excellence for Teaching Professionals Blueprint for Action

- 1. Build the professional framework around articulated standards of practice (i.e., INTASC) with clear expectations for progression in attainment of the professional knowledge base.
- 2. Build analysis and assessment of practice from a base of multiple evidence points in practice with responsible application as to how each informs practice.
- 3. Create advanced and lead teacher roles to support teachers in various stages of professional learning, practice, and transition into and through the profession.
- 4. Build licensure around evidence of attainment of the knowledge base of practice appropriate to the purpose of the license.
- 5. Create and adopt valid and reliable tools to analyze and assess practice and its impact on student learning
  - A cornerstone of the professional knowledge base and the ability to make explicit the practices that positively impacts student learning.
- 6. Build on existing assets in identified professional knowledge bases and structures that correlate to positive impact on teacher practice and student learning
  - Including the collaborative knowledge base that exists in EPPs and the partnerships between schools, districts, and higher education.
- 7. Develop new professional learning tools and structures that give flexibility in access to the professional knowledge base, evidence of having attained it, and evidence of applying it successfully in practice.
- 8. Articulate clear distinctions across pathway entry points and progression focused on successful entry into the profession and transition to fully autonomous professionals.
- 9. Build and fund a compensation and reward model that reflects the importance and value of the teaching profession, and that attracts and retains people in the profession.
- 10. Secure funding to support the infrastructure of the framework as well as its discrete components.
