## Design Concept

The new research center was inspired by the Rustic outdoors of the coastal south. Incorporated into the design was a lot of glass for the ocean, tan colors for the sand and wood for the driftwood and picket fences by the beaches.

## Architectural and Furnishing Finishes

Exposed beams were used to create the rustic look and bring the outdoors in. Plants on the walls as well as plant dividers used in the office space were used in the same manner. A fish tank was incorporated into the reception area to bring a bit of the coastal south oceans into the building.
