# Concept

- The concept of this design develops from the idea that this place embodies a unique and comfortable setting, unlike other competition.
- The consumer is expected to feel comfortable and eager to take advantage of the inspirational aspects of the space.
- A place where creative instincts are easily accessible – minds are safe in this environment to either work hard, or take a break from the stresses of the outside world.
- This space includes a vintage piano, along with a donated wall of books, and a vinyl record station with storage. Providing these accommodations will make give the guests' experience more interactive.

# Color Rationale

- The use of rich and complex colors throughout the space creates a creative and exciting environment for the guest. Using primary colors within this setting is challenging and unusual, this scheme will stand out compared to other competitors.
- Using mainly “unfinished” wood and weathered steel throughout the space will provide an antique and rustic image.
