

# Portfolio II

Lauren Miller

# Music Model

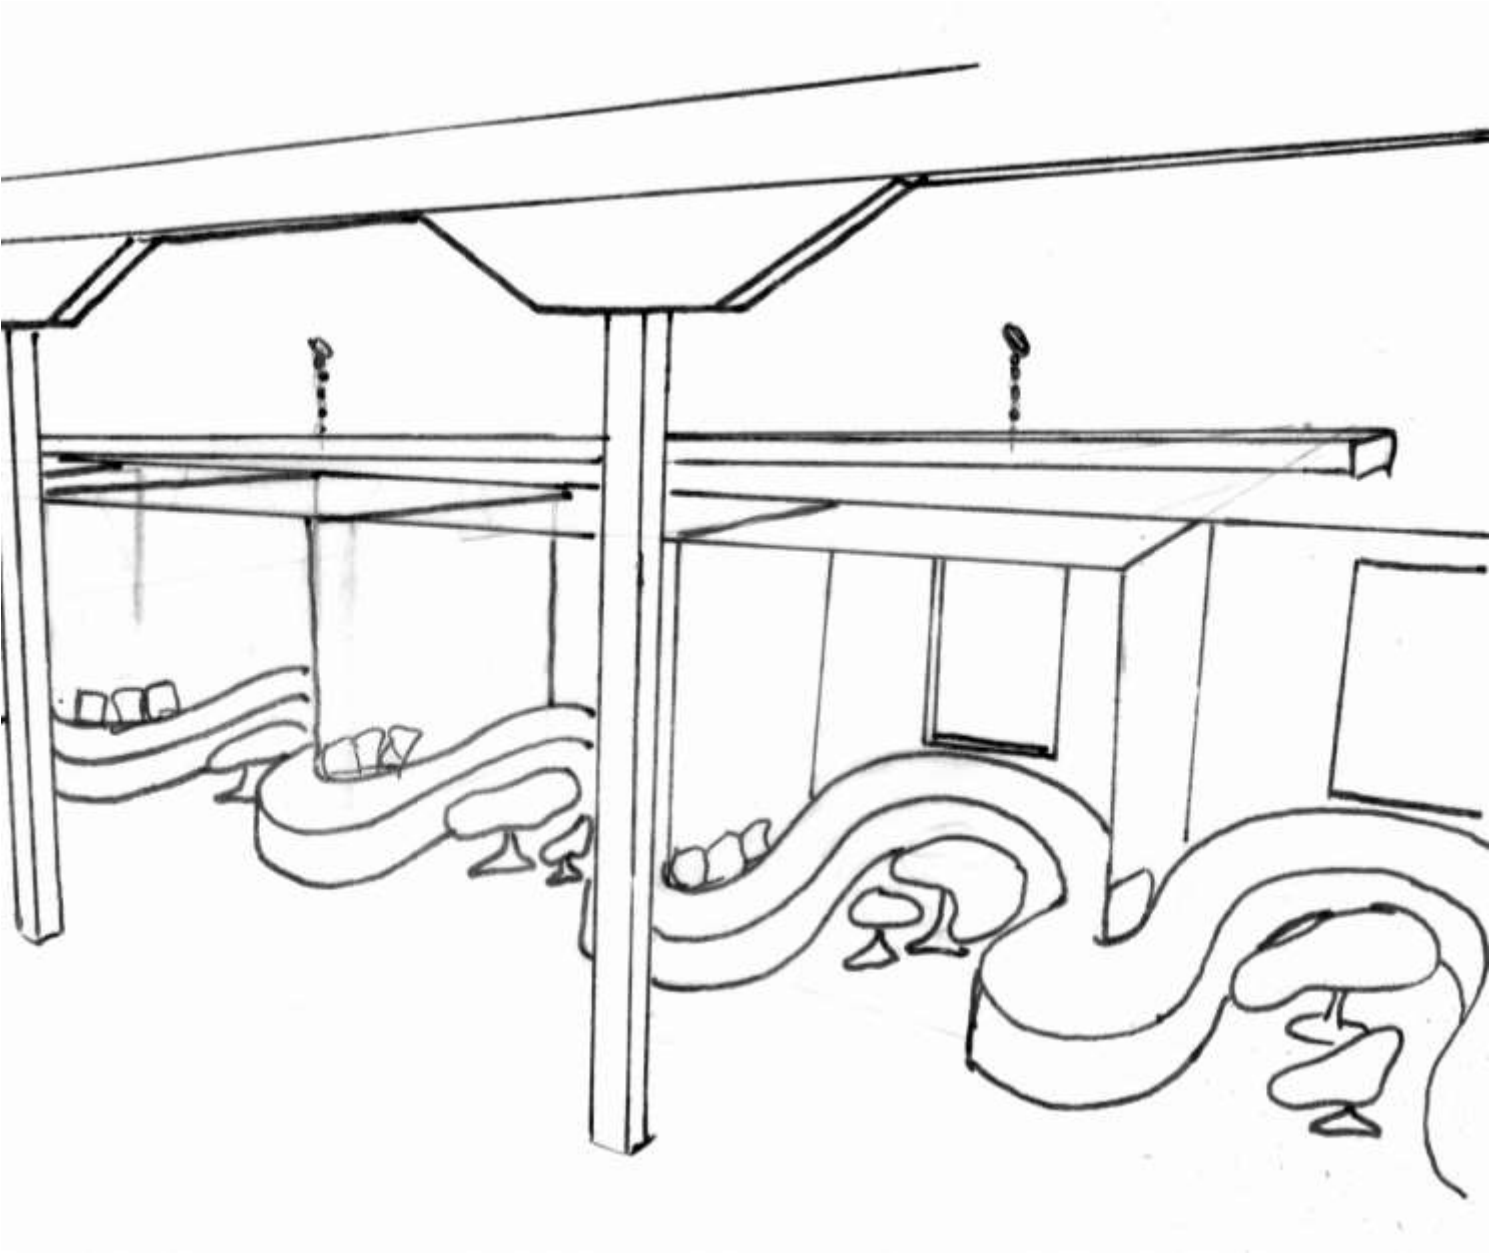

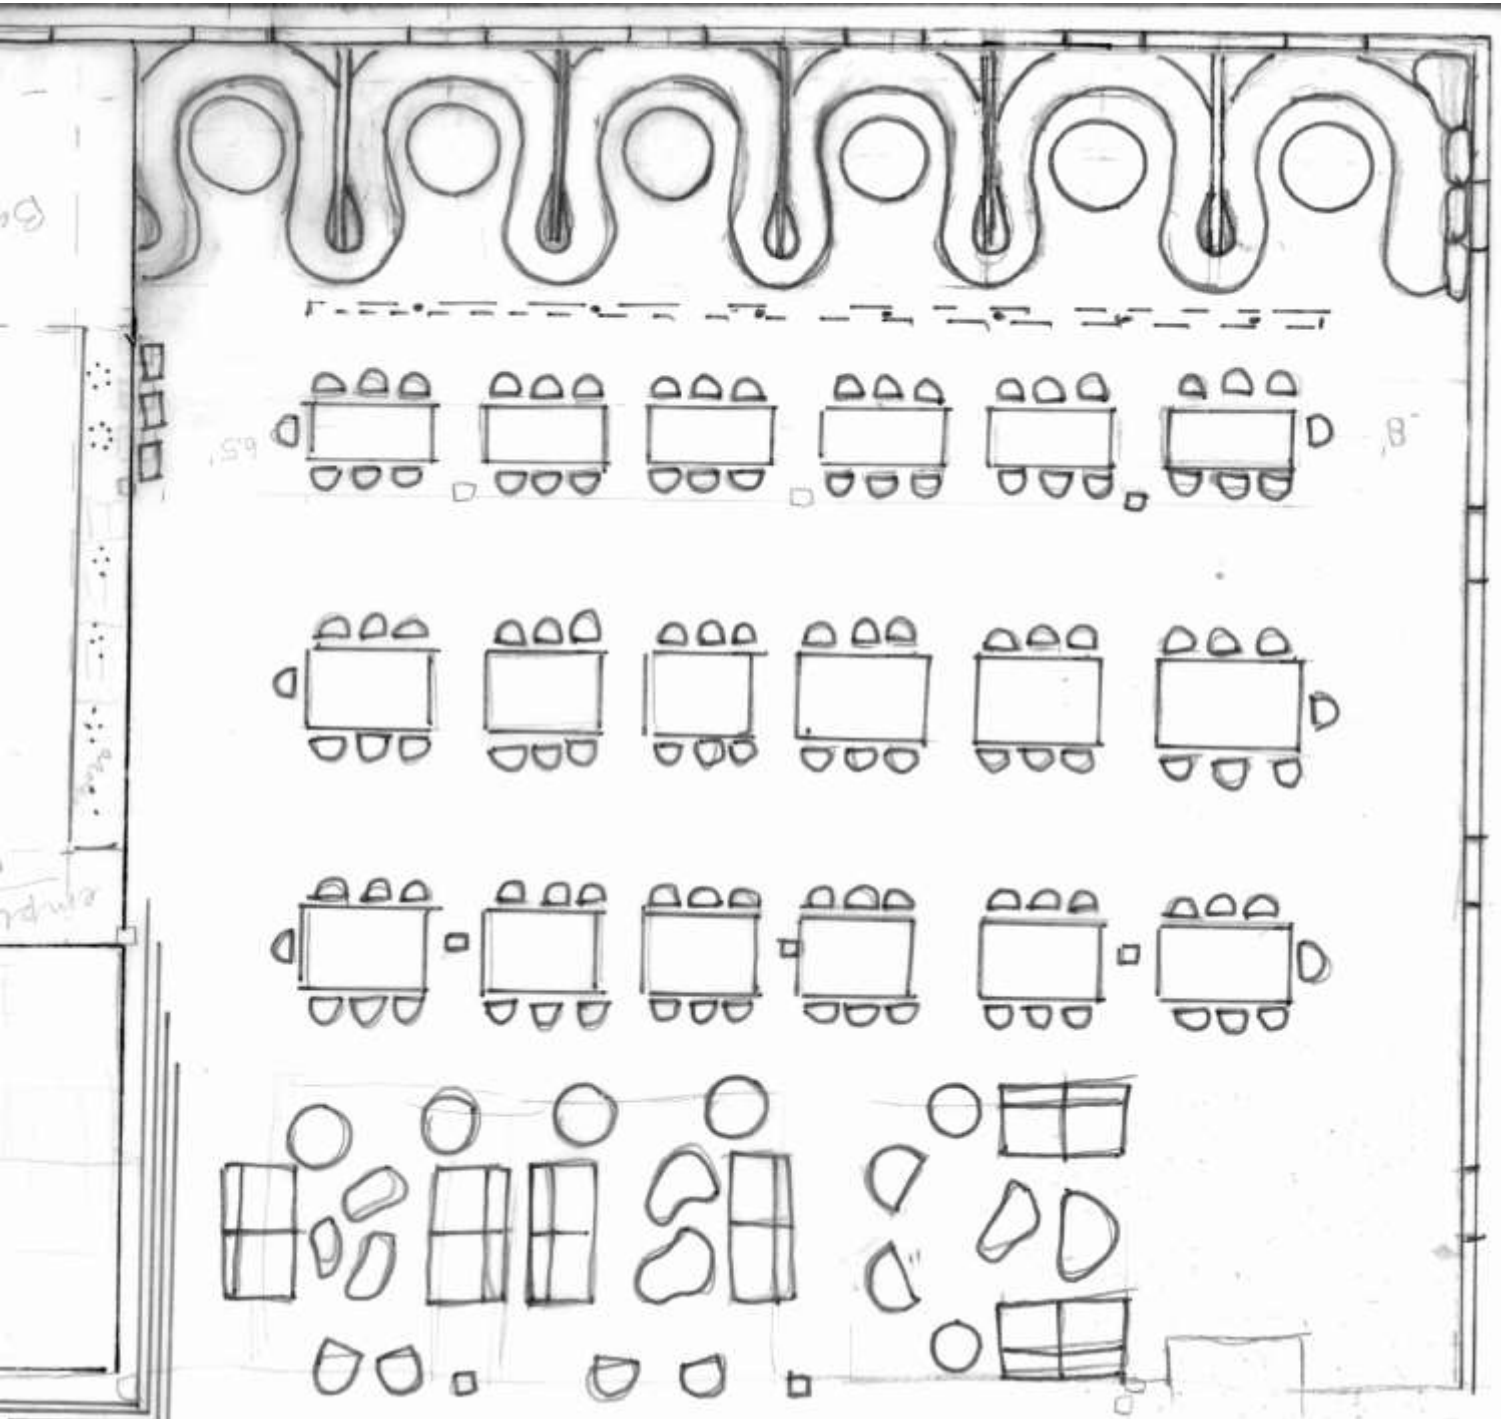

# Music Model

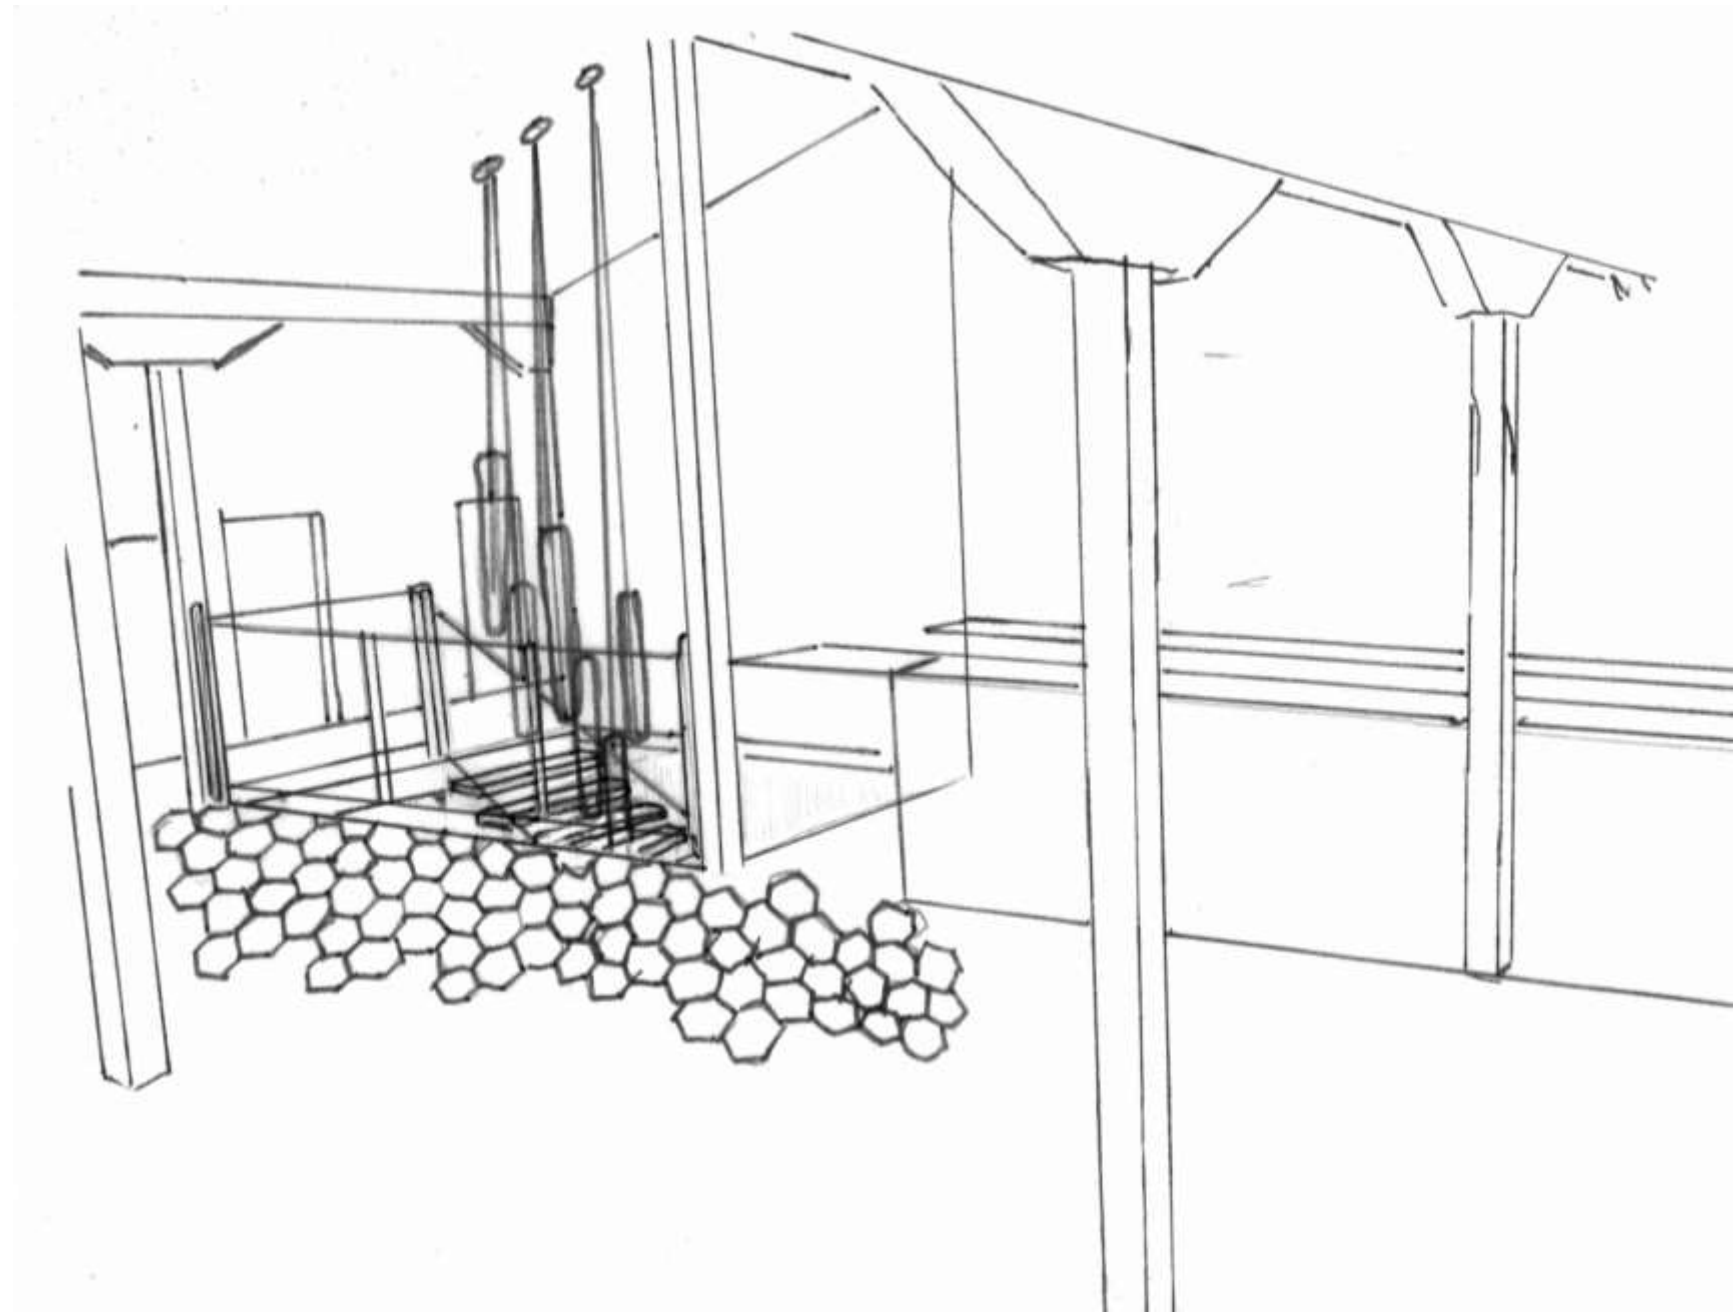

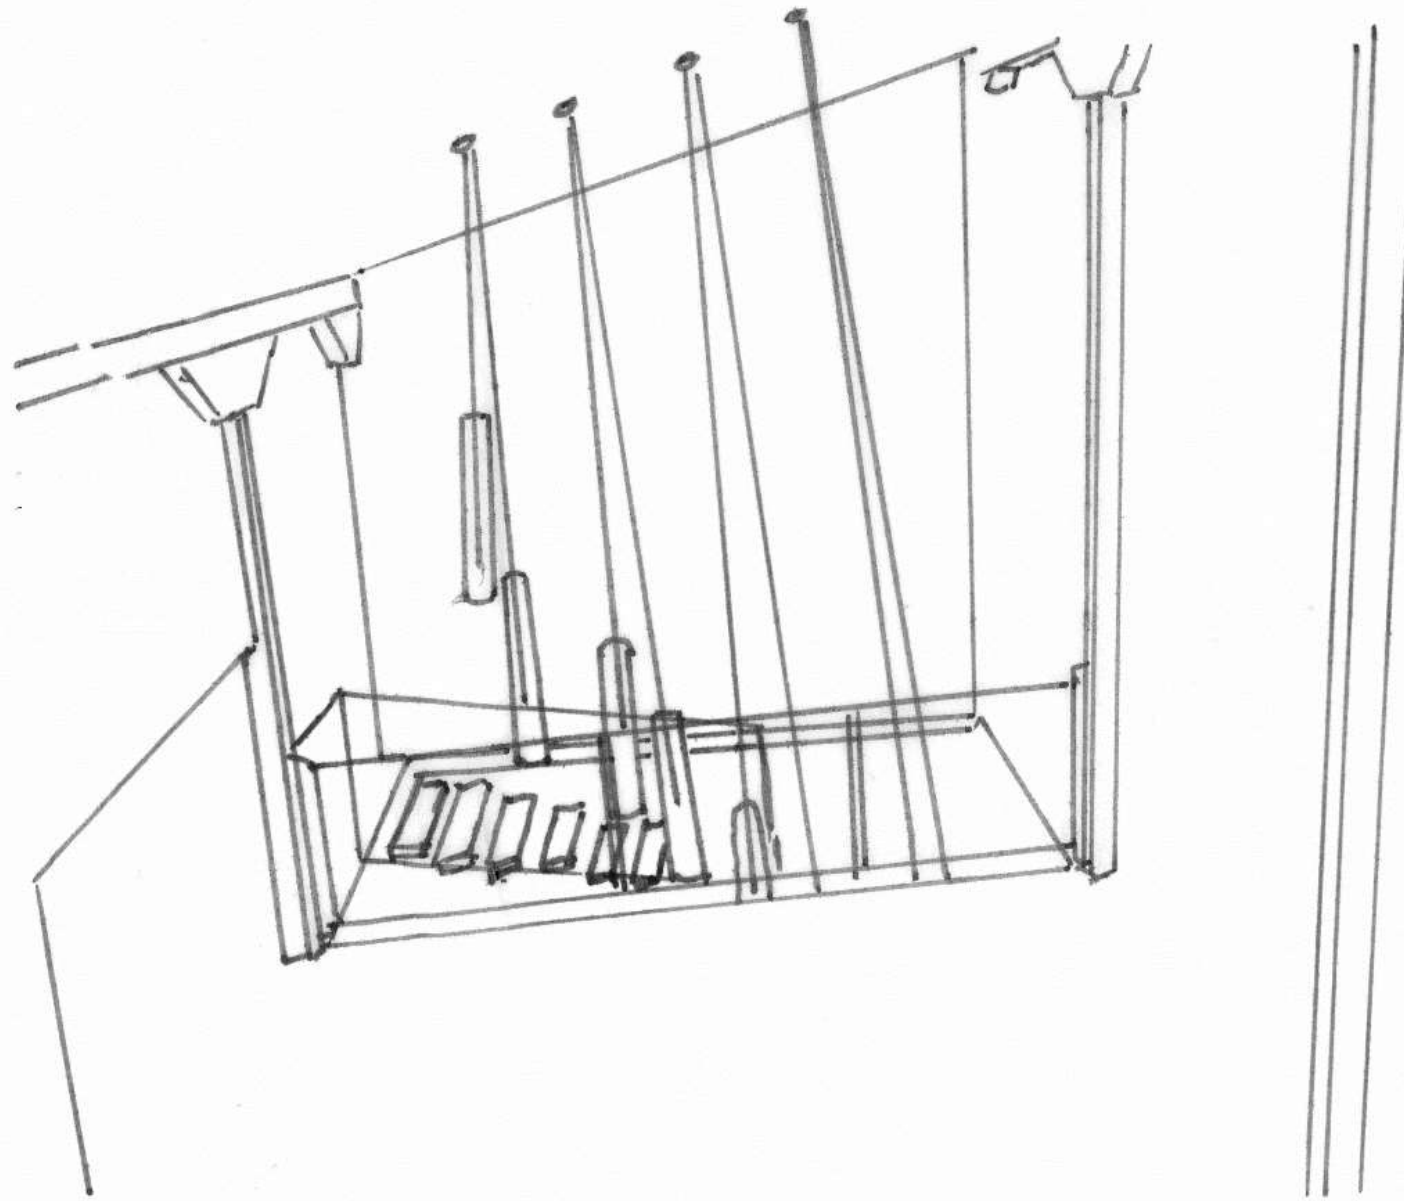

# Wayfinding

In order to help users move around the space with ease, a basic grid floor plan was used. Additionally, tall open ceilings and lighting will be used to help guide users.

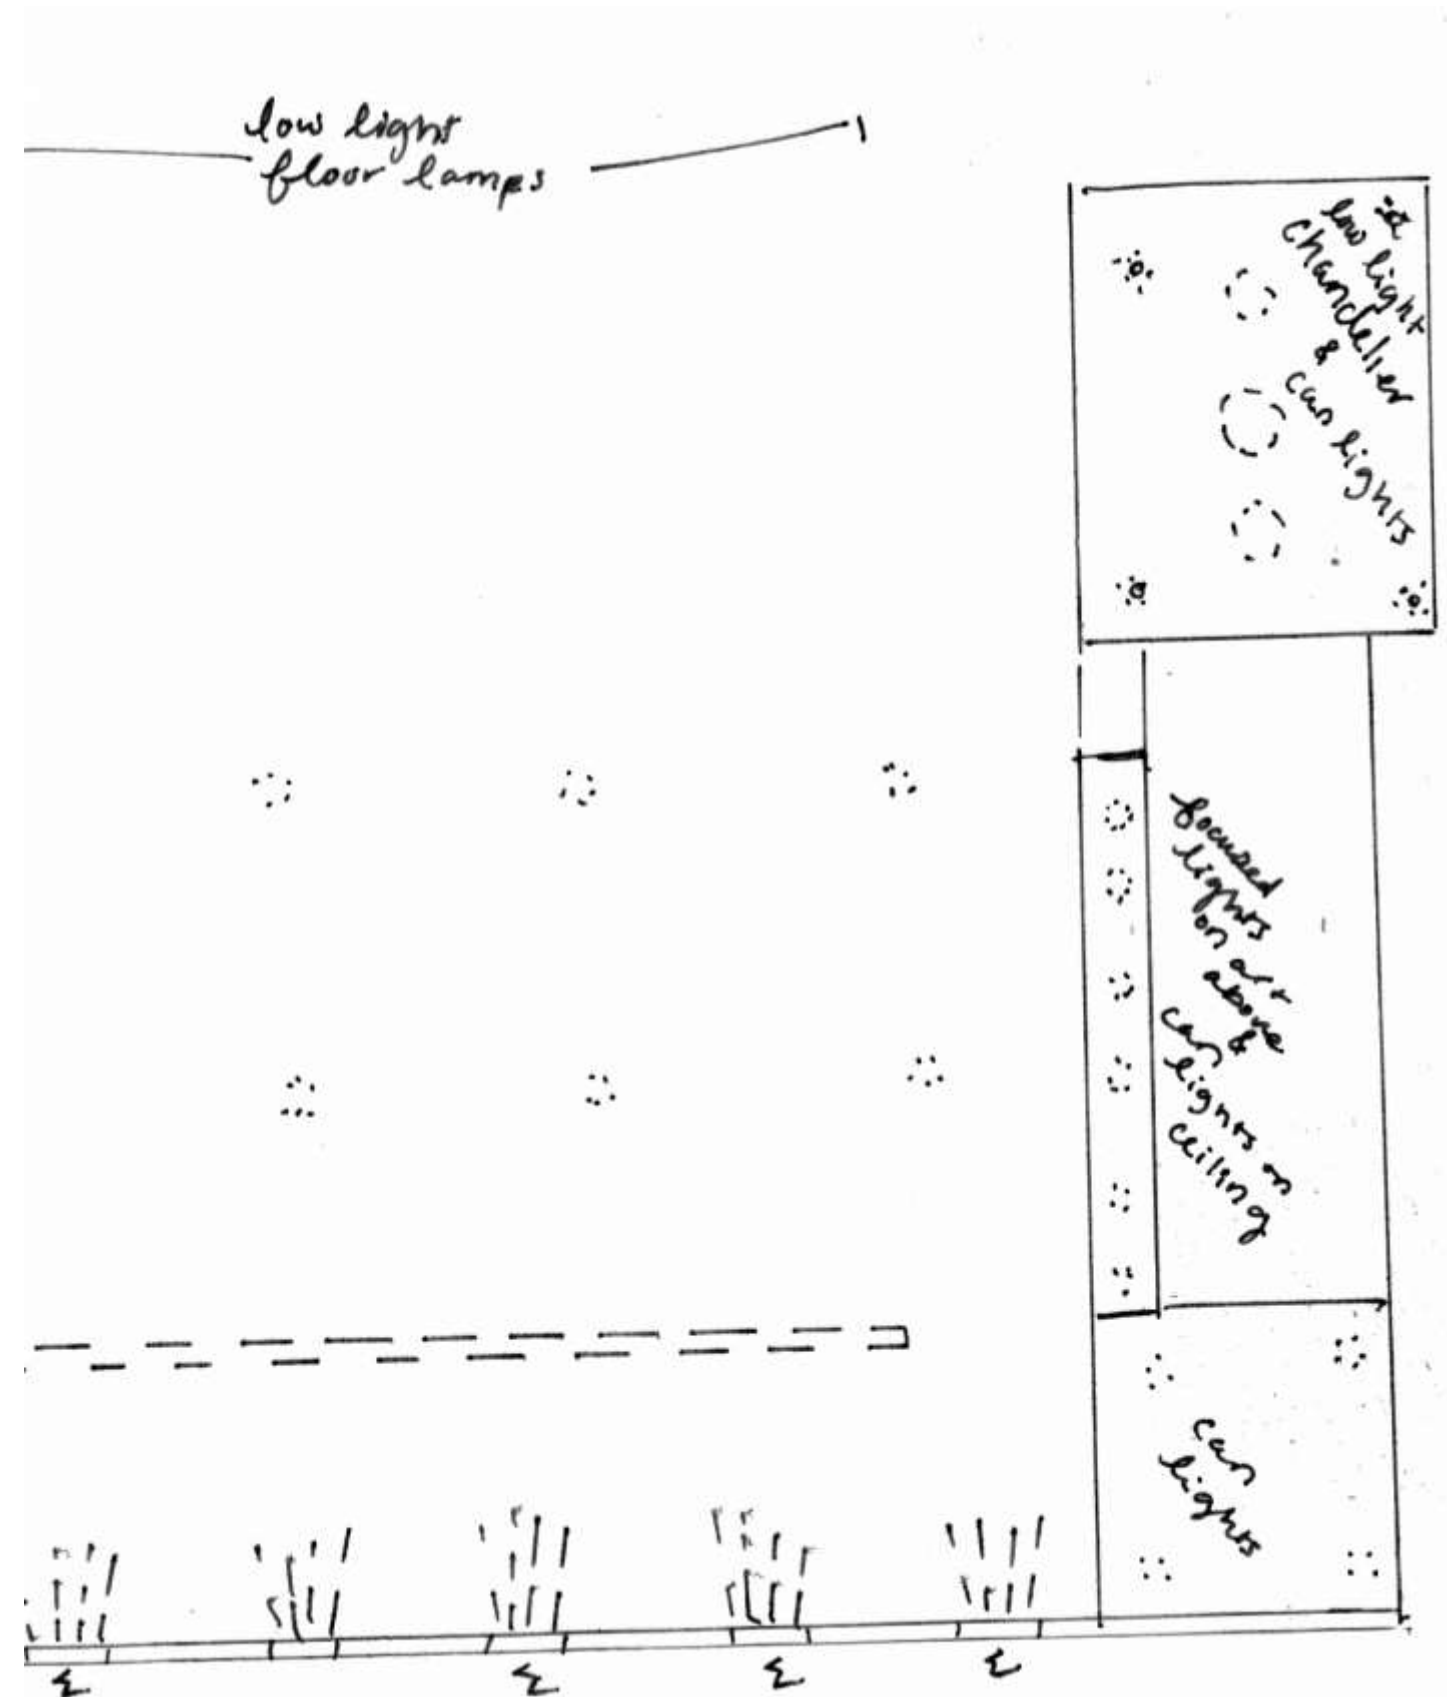

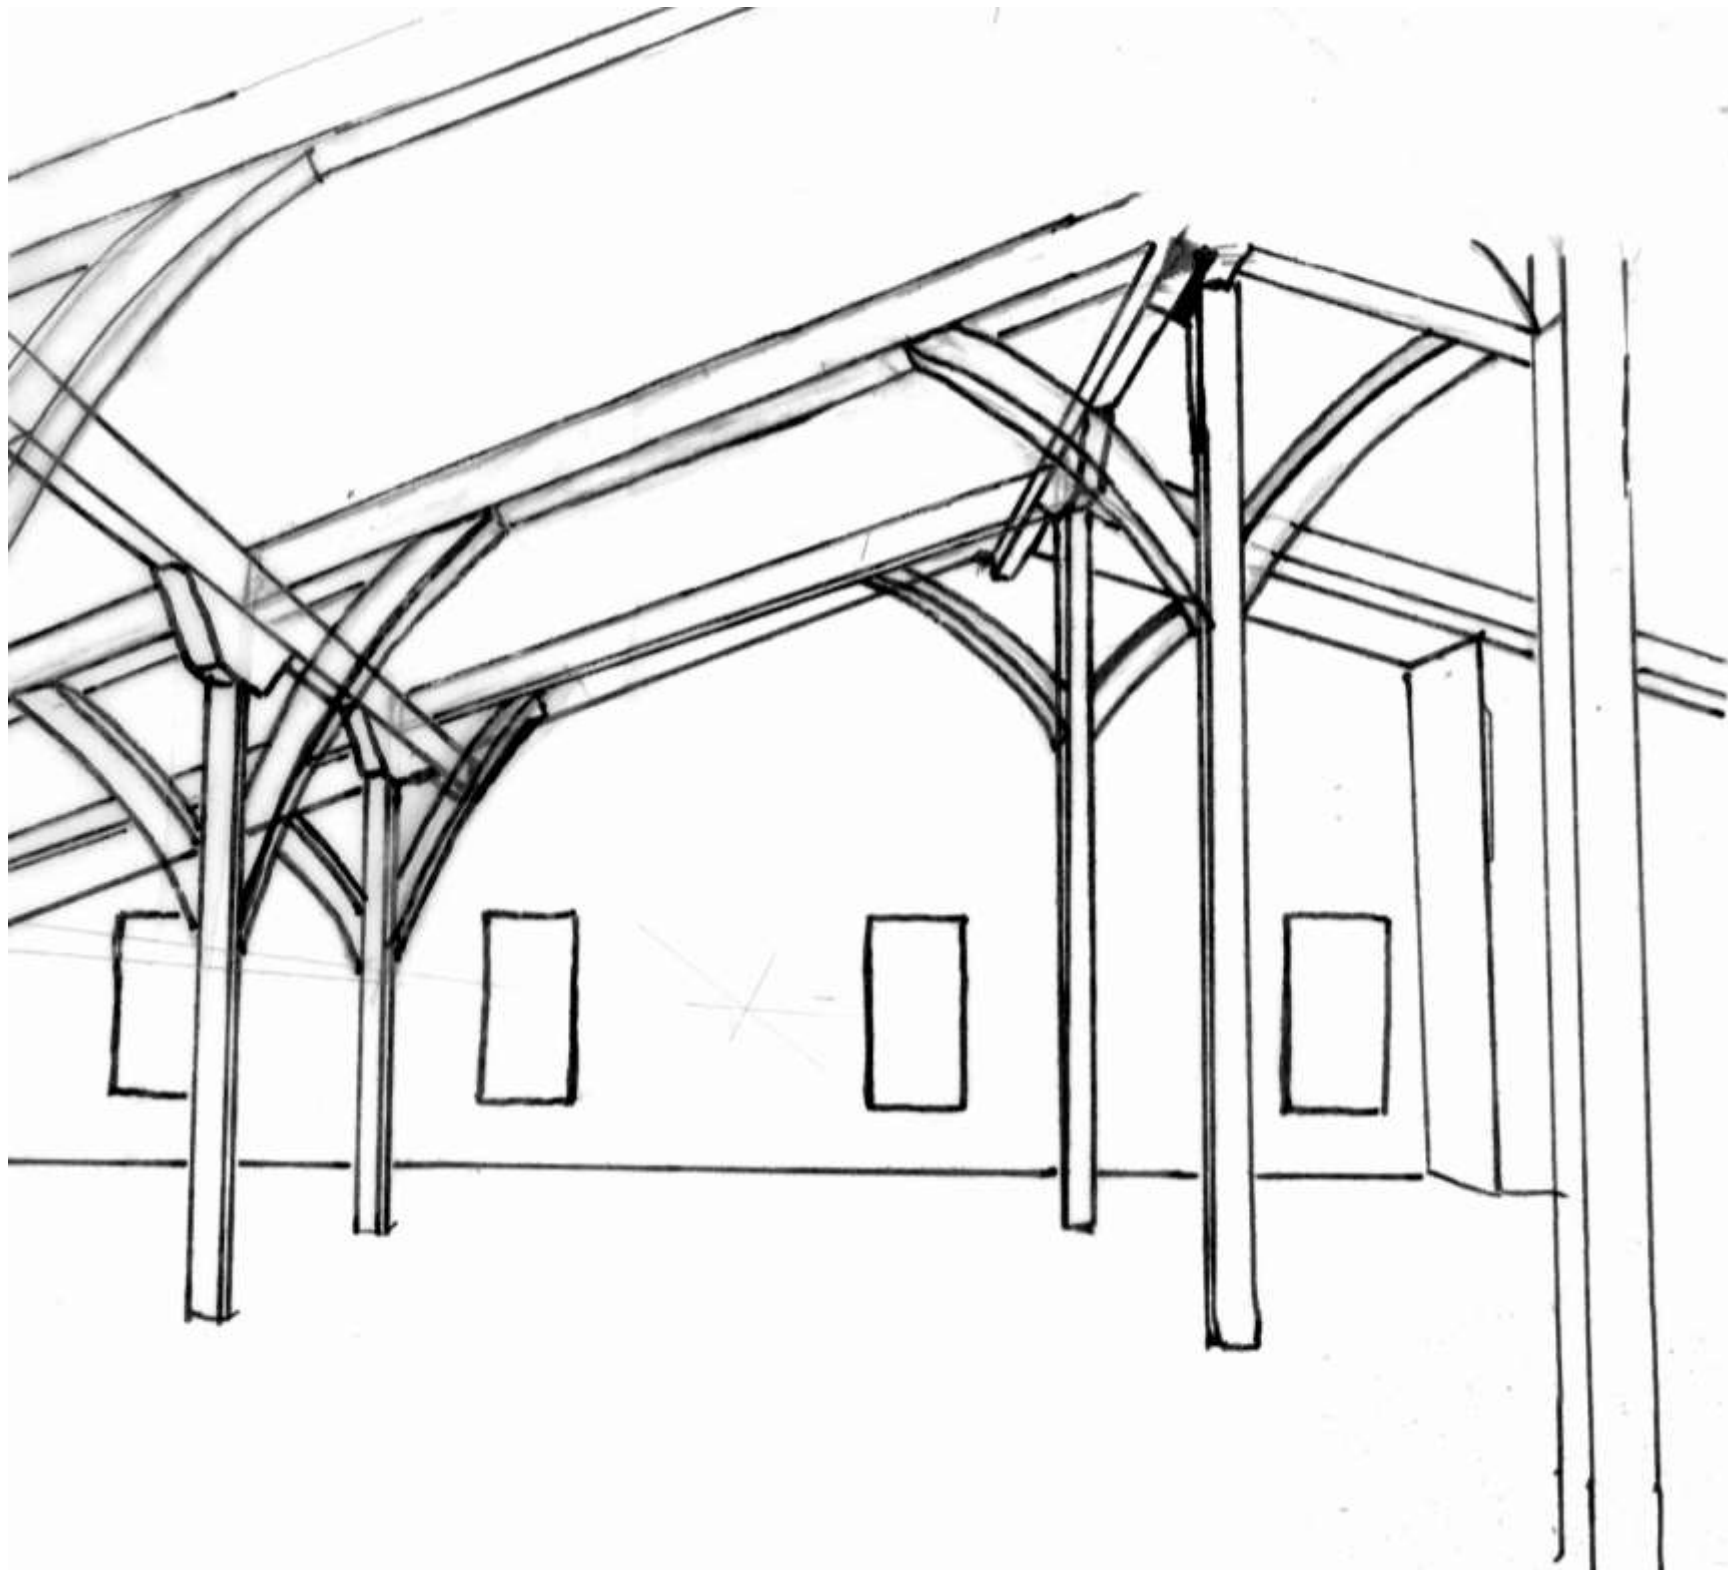

# Stairs

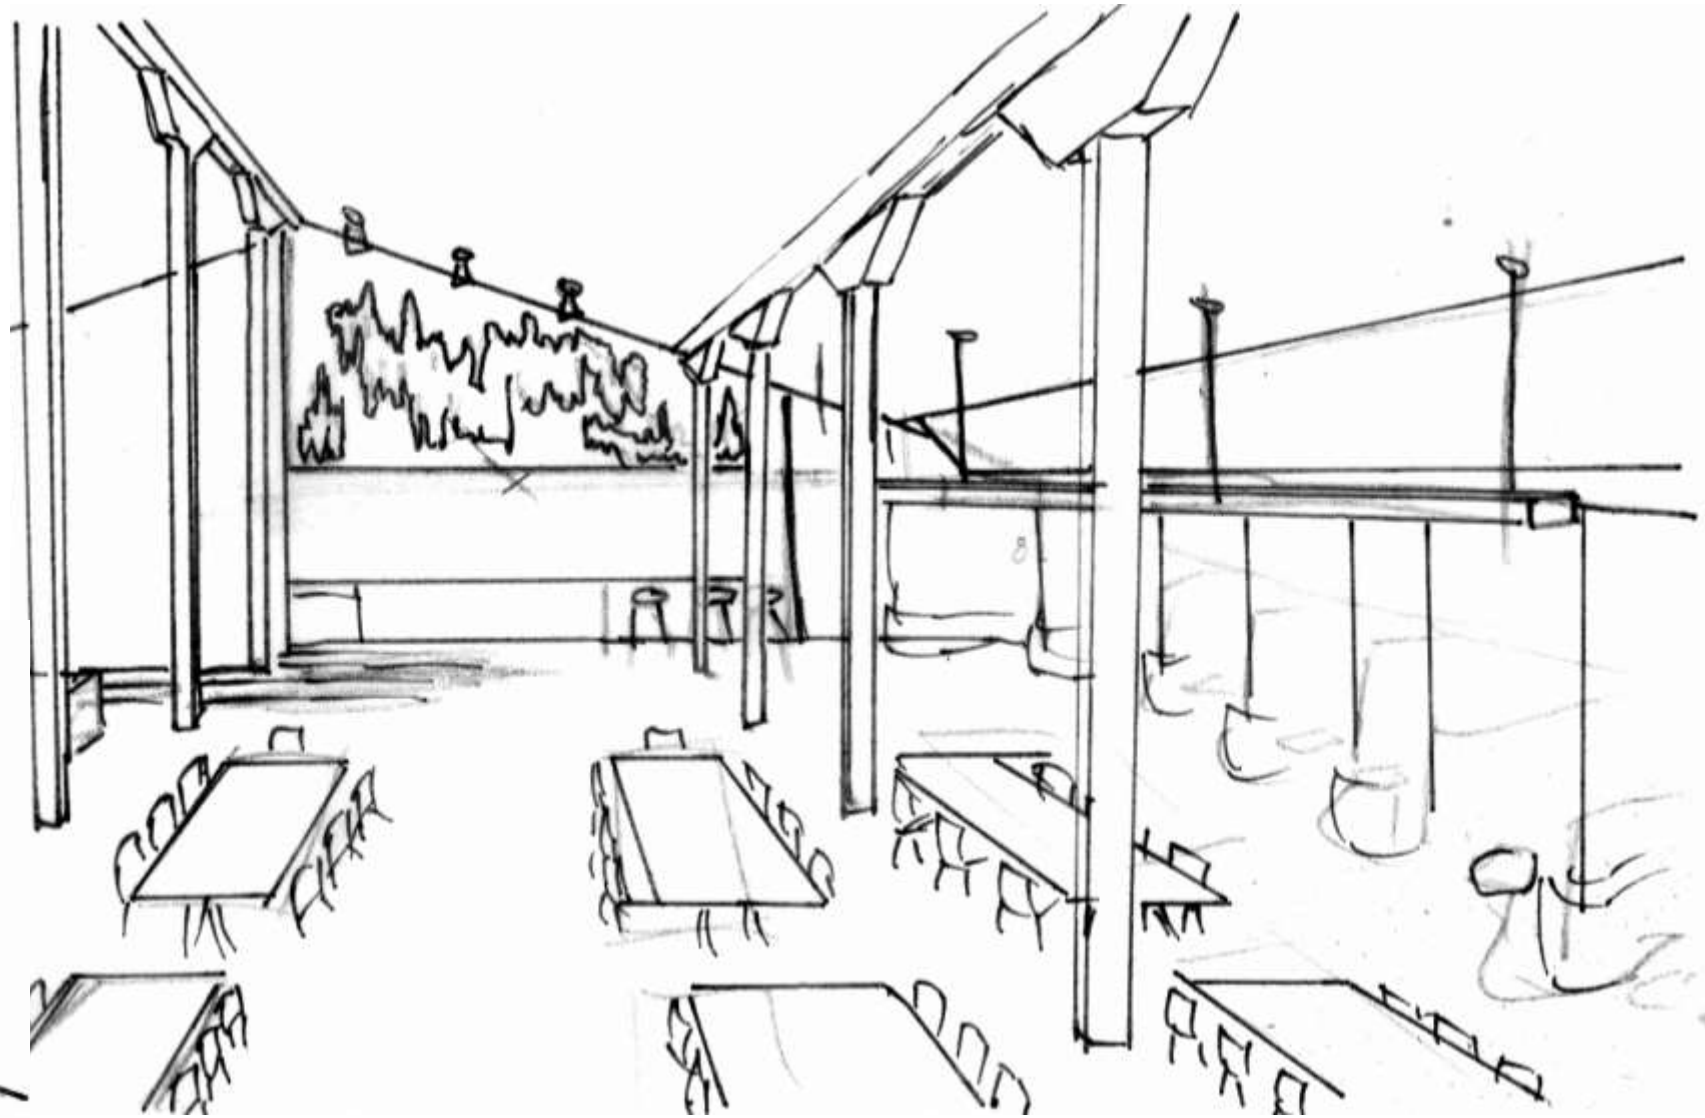

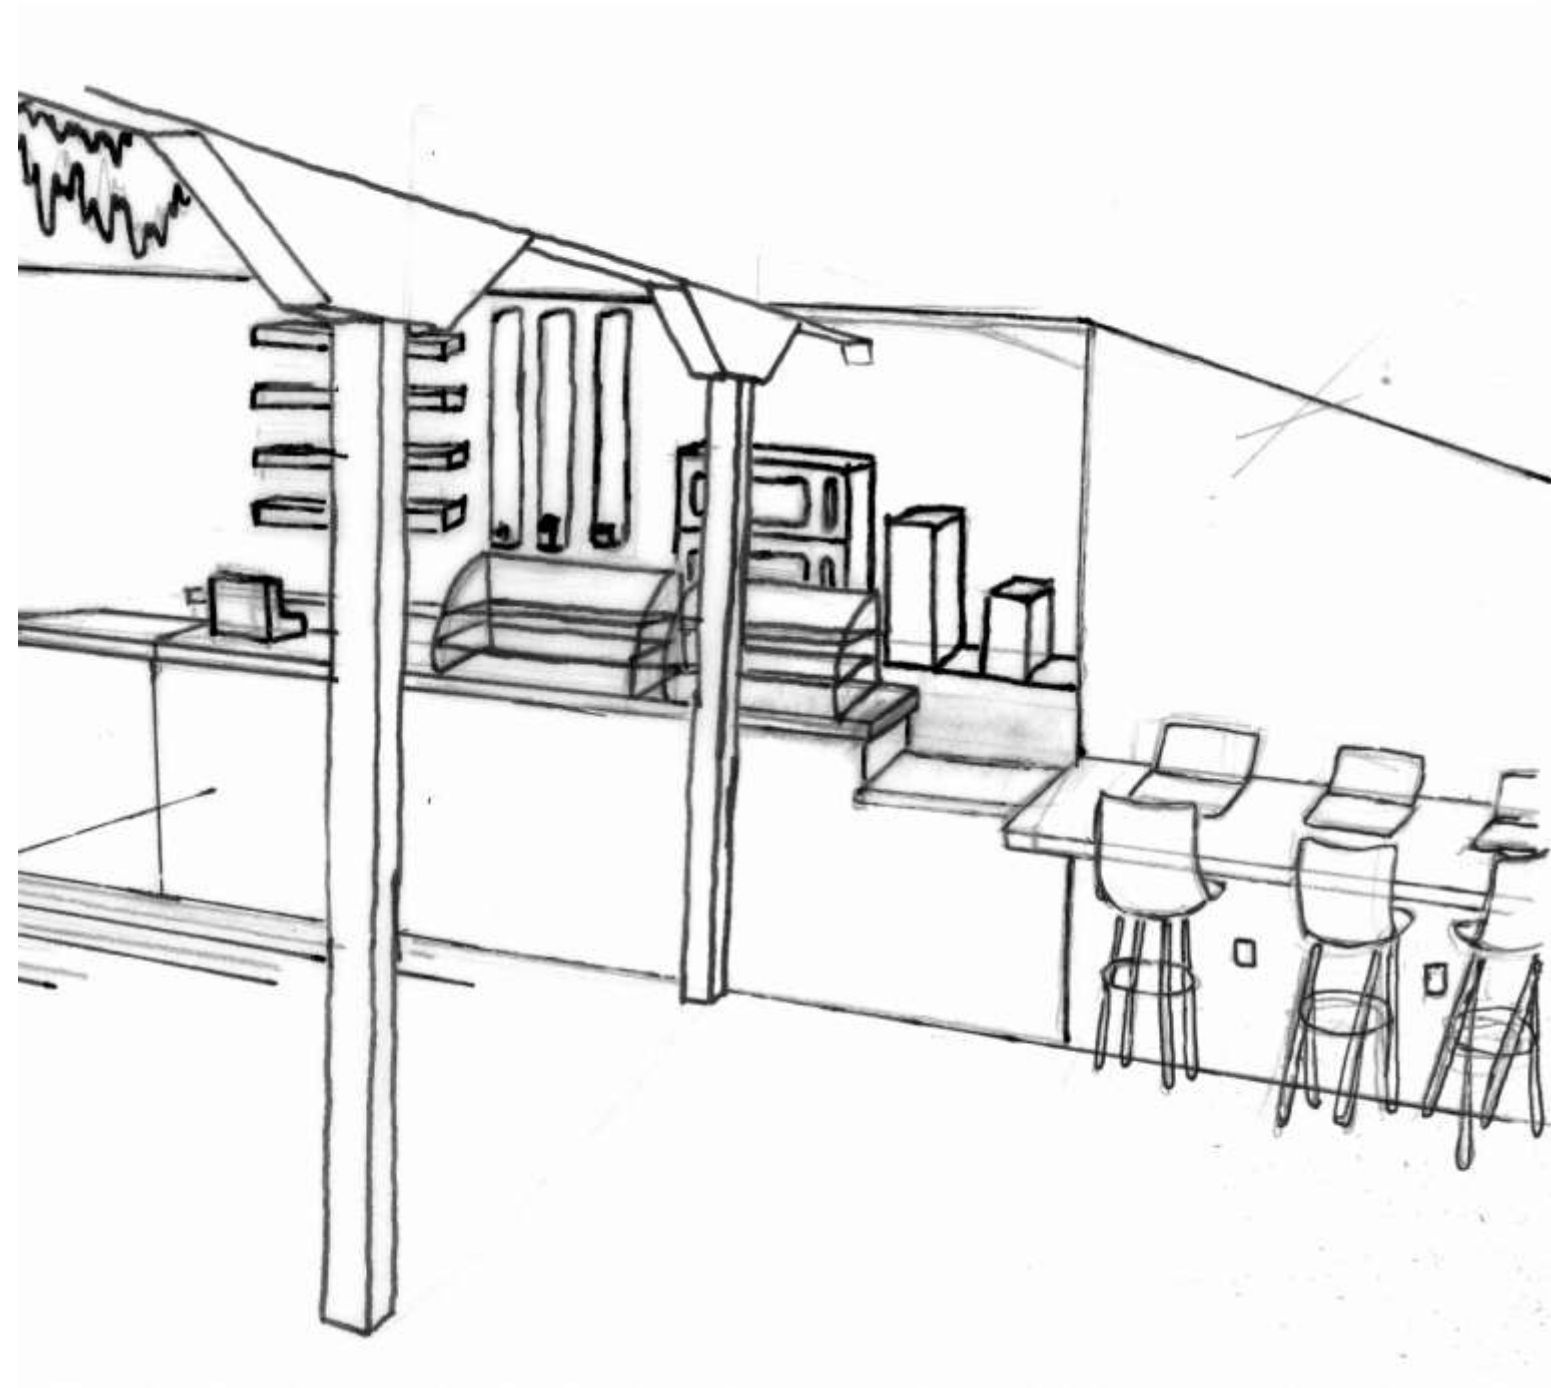

The stairs will be highly decorative, using elegant light fixtures, and glass railings to entice customers into the space

# Ceilings and Daylighting

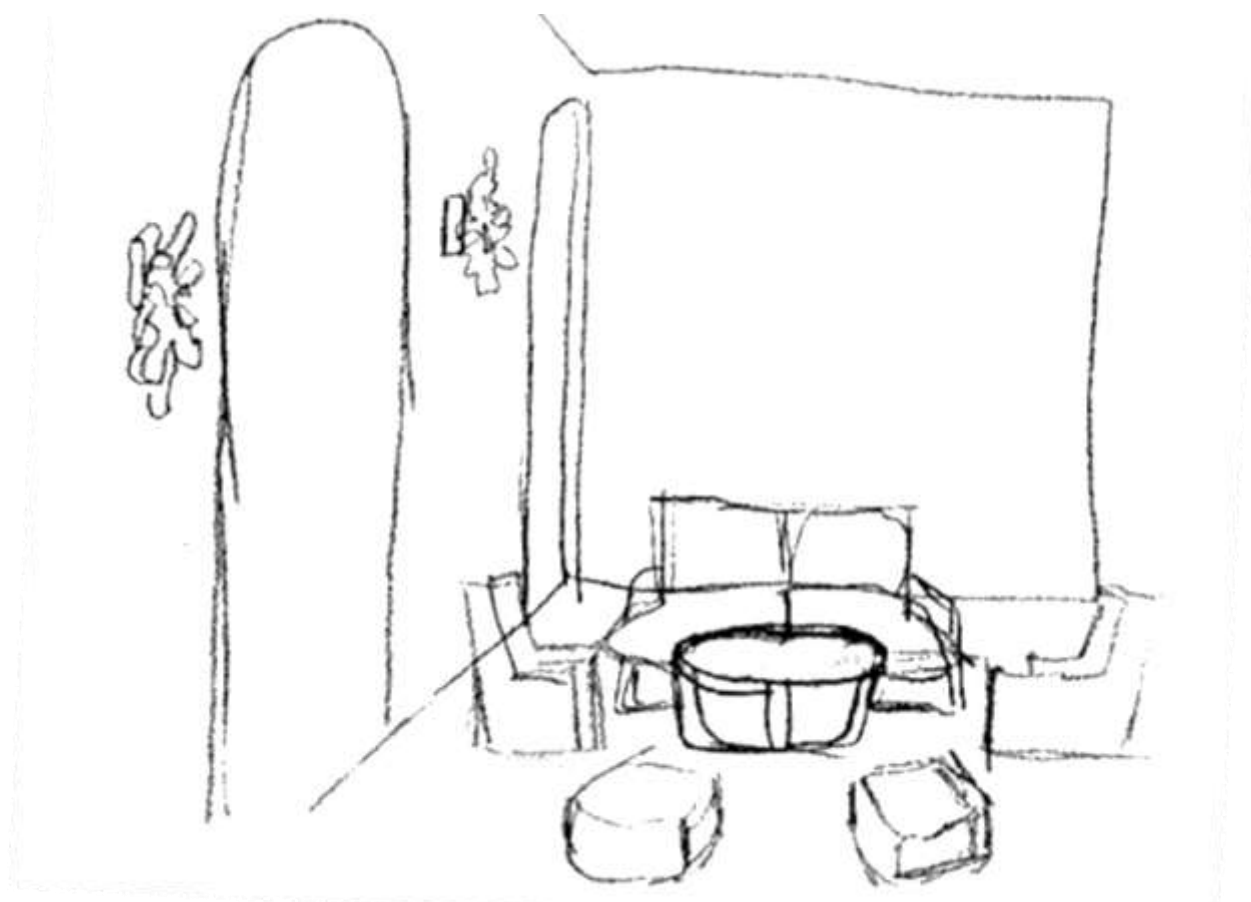

# Service Counter

The service counter's ceiling will be lowered to attract people to the counter, and make wayfinding simpler. Decorative art will also be hung from the ceiling to draw the eye of a user. Its location will also be close to the stairs entrance making it convenient for users.

# Group Work

# Day Dreaming

# Design Concept

- The concept behind this design was inspired by the Millennium Campus, and its purpose of creating new ideas
- The design concept can be described as modern, with clean white lines, and bright interiors.
- This will be the ideal setting for relaxing as well as working because of the calming design

# Design Concept

- In an effort to create foot traffic for the business, and to generate a creative atmosphere, the coffee shop will be conjoined with art exhibits
- The newest trend in museums, photography, and tourism is interactive art
- This would attract business from the local university aged students
- Room can be left in the floor plan for drawing tables, or an art room

# Color Rational

- The color scheme will be split complimentary
- The colors will fit in with modern trends, and also keep the interiors from looking too stark.
- The colors will be muted, but will have a large impact on their white background
- These colors will mostly come out in art pieces, and in seating
