Assignment 9:

Concept:

- Much like the tobacco barn, the classic general store can still be found sprinkled throughout Eastern Carolina.
- The general store is mainly just a North Carolina novelty now, thanks to the invasive nature of big chain stores, but general stores really have been a pinnacle component to many small Carolinian towns.
- The concept for this space is to have a general store/ classic lunch counter feel, but make it modern, clean cut, and inviting.

Assignment 9:

Color Rationale

- A major design problem with this space is the lack of windows and natural light especially on the first floor.
- To keep the space from getting too dark, shades of white and light, warm wood will be used throughout the space.
- Color will be incorporated through accent pieces like chair covers and bar backsplashes/ finishes.
- Shelving units will take up much of the space so it was important to choose a light maple wood to keep items from 'disappearing' into the unit.
