CONCEPT

Sustainability & Social Responsibility

Sustainability in design is a key focus in many designs today. It is important to enable mutual respect and understanding that the environment and the community share a common value.

Teknion has a drive in committing to sustainability through their designs. The showroom will demonstrate this by a balance of earthy, organic tones to showcase Teknion energy efficient materials that will allow the consumer to appreciate the importance of sustainability while focusing on the designs at hand.

COLOR RATIONALE

A cool color palette
which resembles the
organic uniqueness of
the earth and its
materials for a feeling
of rest and relaxation.
