## RENDERED EXTERIOR ELEVATION

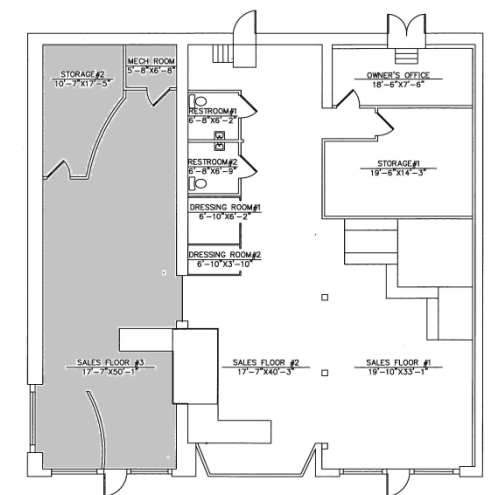

The thinking behind the color scheme for the 5th street location was inspired by the interior color selections based from the client's wants and Community Smith's desire for an exterior that compliments the surrounding buildings. For historical preservation purposes the majority of the exterior will be red brick, with shades of red, black, and gray as accent colors. To add visual interest to the exterior, a mosaic tile honeycomb pattern will grace the top face of the building.
