DESIGN SKETCHES

These are sketches for the playground that is located upon entry and the hallway which leads to classrooms. The sketches are showing a rock climbing wall with mountains as background, grass, and trees to allow the kids to experience the outdoors in the heart of downtown Raleigh.

DESIGN SKETCHES

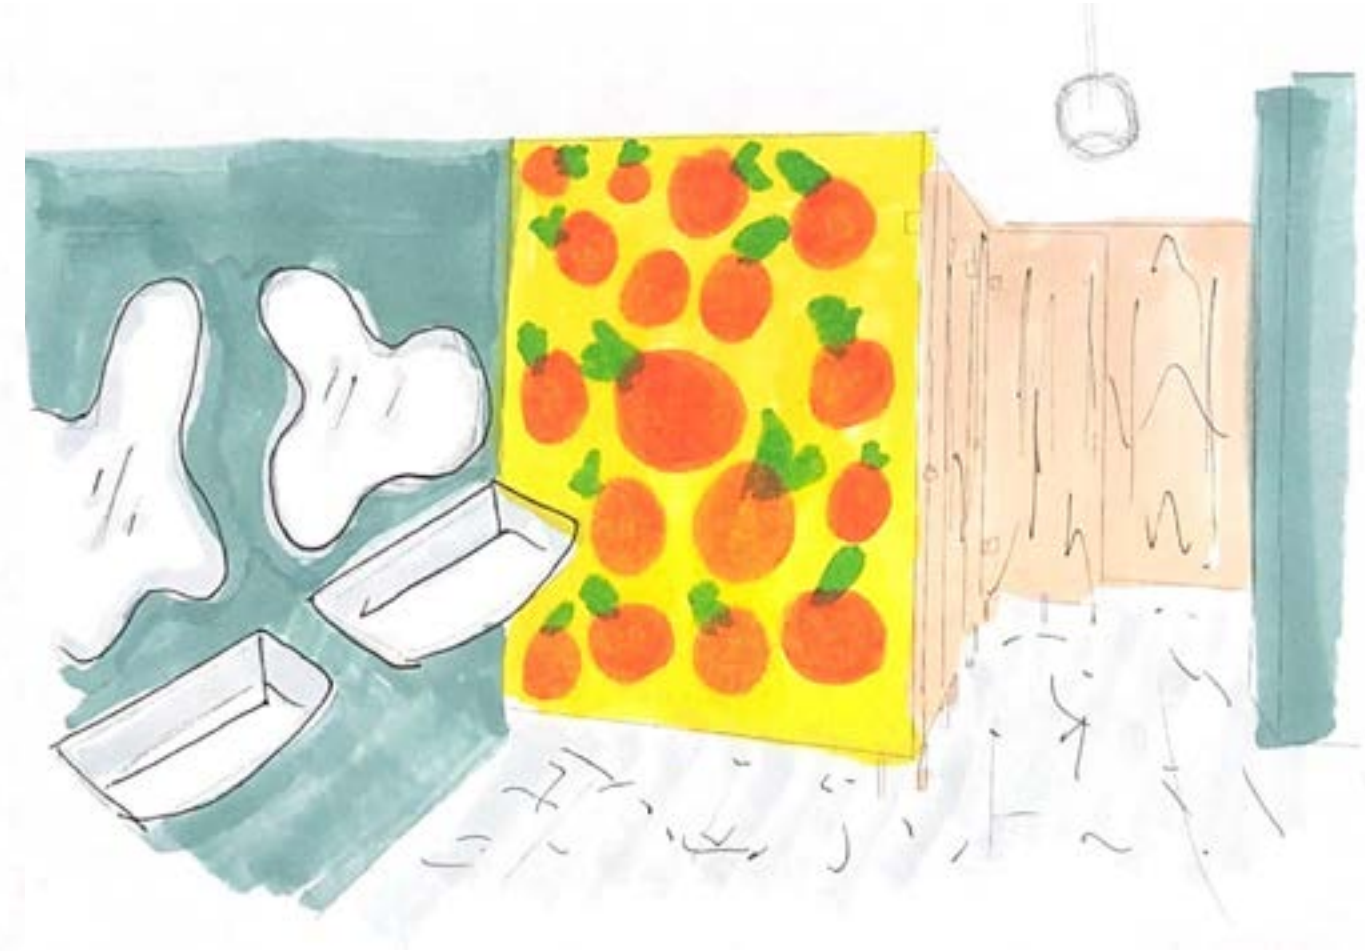

This is a sketch showing the nap room where kids feel safe and rested. Space is inspired by the night theme. It features clouds, moon, and stars. The room has beds and storage for kids to feel cozy and staff to be able to store materials and equipment.

DESIGN SKETCHES

The theatre room is where kids develop their imagination. The room will have floor pillows/cushions seating for easier rearrangement.

A bathroom is a place that kids learn about their hygiene. The sinks and toilet seats are in different height ranges for kids to reach comfortably.

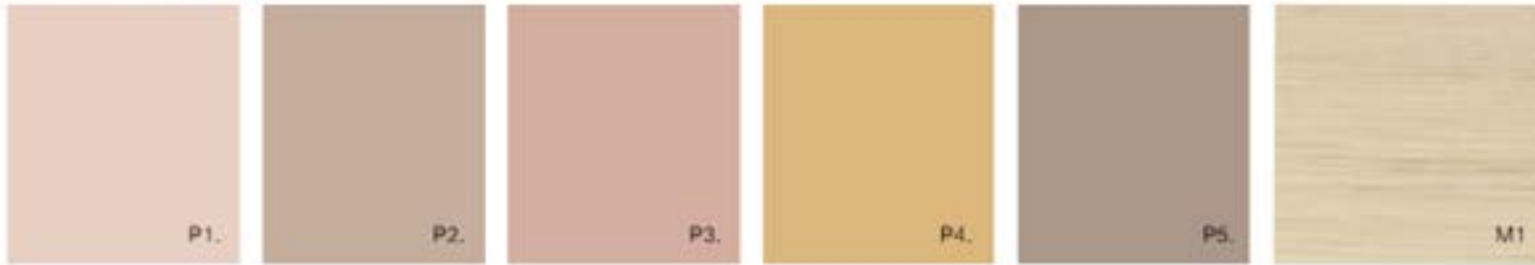

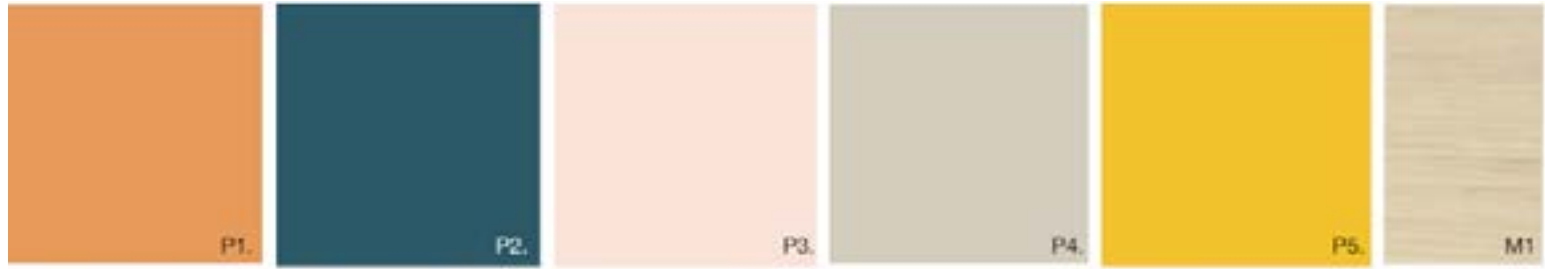

The classroom is where kids expand their knowledge, be active in groups and have a healthy environment to express their feeling. Being able to have a movable desk and seating arrangement to encourage kids in participating in learning activities. Each classroom has its storage space to store material and kids will have access to cubbies to store their items.
