## Color Palettes

Our architectural features will be neutral colors, such as browns, tans, whites, and possibly some black. The colors chosen go well together and tie into our design concept. They address nature, ECU, and neutral colors that are all calming and colors many people can enjoy.

# Design Resolution Statement

## Challenges

- To resolve the issues revolving around Greenville being a college town, the design of the rooftop bar, side patio, back entry, and lobby/lounge will consider the needs of older individuals/ non college students. It is important to attract an older clientele.
- Implementing a college theme while keeping it professional and the Hilton Garden Inn Design.

## Resolution

- To achieve this goal the design will be contemporary with elegant fixtures and natural materials that appeal to a large group of people.
