 Small Watercraft Recording

Description

This is a "Legend 16 Dagger" type canoe-shaped small watercraft named the "JACKDAW". A handprint and the name decorates the port-side bow. The name and "Dagger Legend 0902016" along the starboard-side stern are upside-down in case the craft flips over. It is a two seated canoe with two knee/foot pads for both seats. A yoke and a thwart support the craft between the two seats. Identification on the inside of the port-side bow shows ownership of the craft to be ECU Recreational Services. It appears to be made of blue-green fiberglass material with wooden support beams and white and yellow detailing.
