# TOP 30 MISSED Questions PUZZLE

These mathematics questions were most often answered incorrectly by high school students across North Carolina on NC EMPT practice placement test versions (2012-2013, 2013-2014, and 2014-2015). The questions are typical of those found on actual college math placement exams throughout UNC institutions and NC community colleges so it is important to practice and avoid the same errors. Pages 1-3 list the 30 questions. The last page contains the scrambled answers. Show all work for each problem on notebook paper and then write the correct answer from the last sheet next to the appropriate problem on pages 1-3.
