

Moving a Presentation to a Shared Folder from Drafts

Click on the Presentation to open.

The screenshot shows a video player interface. At the top, there are buttons for "Record New Video", "Upload From MDR", "Upload New Video", and "Delete". Below these is a video player window displaying a presentation slide with the title "Who is The New Guy?" and text identifying Mike Schwartz, M.D., Professor, College of Allied Health Sciences, Department of Physician Assistant Studies, East Carolina University. To the right of the video player is a menu of actions: "OWNED BY JM Jean Merenda", "Watch", "Edit", "View Analytics", "Publish", "Copy To", "Move To", "Edit Video", "Edit Slides", and "Edit Quizzes". A red arrow points from the text "Click on the Presentation to open." to the "Copy To" option in the menu.

Select Move to and locate the correct "shared folder"

Make sure Inherit Permission from parent holder is checked and click Move Presentation.

## Move Presentation

- Place this Presentation in your Drafts folder.
- Place this Presentation in a Shared folder.
- Place this Presentation in a Channel.
