

CAMERA OPERATOR(S) NEEDED
August 19-20, 2016

If you are a student with broadcast camera operator experience via a college program or local cable access network, we have a unique opportunity for one or two individuals to work with our touring crew at an upcoming concert in Greenville, NC at the East Carolina football stadium. Concert experience is a plus.

Ideal candidates will have worked broadcast cameras, with long lens, studio kit and are adept at zoom, pan/tilt and focus functions. A second position may be available operating a robotic camera to get point of view angles from stage.

The opportunity is for August 19 approximately 9am – 6pm and August 20 approximately 11am until midnight. Pay rate will be discussed with candidates who apply, a stipend is available for your time, of course. You must be available the entire period during the two days.

If you have the experience and confidence to work with national touring entertainers and a seasoned crew, please contact Chris Tahti via email: chris@birchtech.net to begin the discussion. Please include a resume of your prior work and equipment familiarity. You must be able to bend and lift up to 75 pounds frequently, stand for long periods of time and have great or corrected vision to accomplish the tasks assigned. Birch Tech does not discriminate on the basis of ethnicity, gender, religion or any other reasons people hold others back – we are all in this together!

As we tour the country, we enjoy helping local camera operators cut their teeth and get exposure to our industry. If you have what it takes reach out as soon as you can, we normally fill these positions immediately.
